Current perceptions on climate change impacts and adaptation for arable crops in Europe

J.E. Olesen, M. Trnka

This study was made possible through the joint effort of the COST 734 member countries and their national delegates. The team of co-authors included in particular:

The team of authors was supported by number of collaborators who are acknowledged in the COST 734 publication p. 328.
Motivation and a bit of results:

For the rest see the COST 734 WG4 poster.
Conclusion (unofficial):

Some difficult questions need not to be resolved by complex modelling.....

Just talking over the beer might make them more approachable ....!
